

VINE CUT BOOKCASE KIT

©2025 Teri Hanson/Teri Hanson Miniatures / PERSONAL USE ONLY

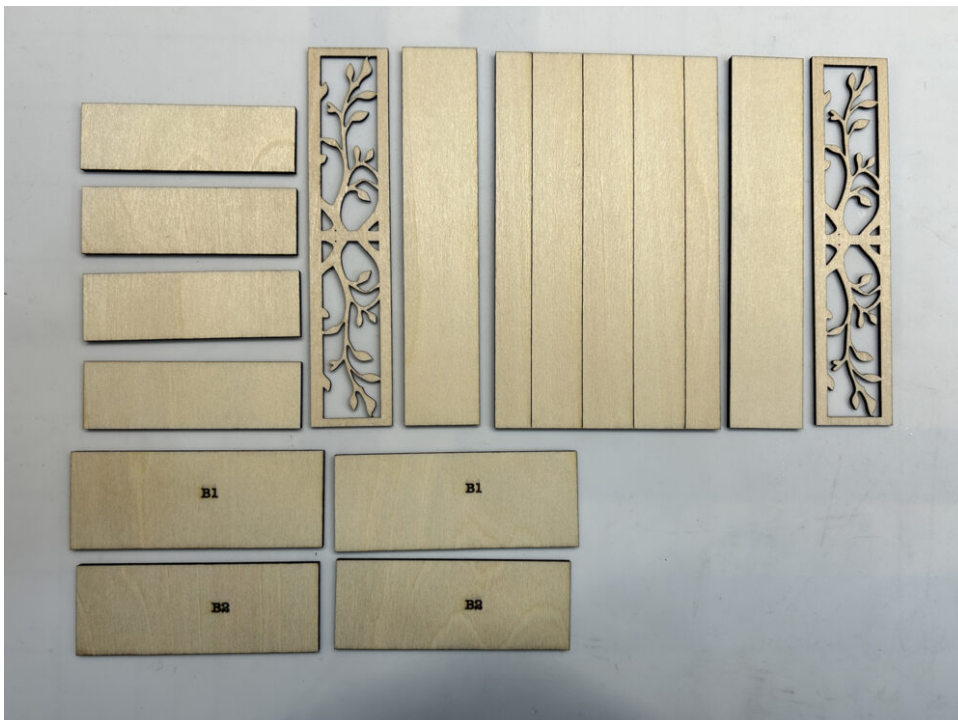

This rustic bookcase should be created from 1/16" and 1/8" quality wood. The thickness of wood is based upon the scale you are making.

- 1:12 – All from 1/8" except for the vine cut side pieces that should be cut in 1/16" wood
- 1:24 – Cut all pieces from 1/16" wood
- 1:48 – Cut all pieces from 1/16" wood

These instructions are the same no matter what scale you are working in.

Parts diagram . . .

VIP NOTES: *Resize the pieces by selecting all items and size at the same time. Double check your dimensions before cutting.*

- *BLUE – Scored*
- *RED – Cut*
- *BLACK – Ignore*

CONSTRUCTION . . .

NOTE: *When gluing pieces together, place the scored letter sides where they are least likely to be seen! Use a toothpick to remove excess glue as needed.*

- Glue one solid side piece on top of the scored back wall, keep it flush with the side edge of the back wall, and flush at the top and bottom edges.
- Use a ruler to measure and mark four one-inch intervals from the bottom to the top of the back wall. These can be used to place the shelves or you can place them wherever you like.
- Glue the remaining solid side piece in place as you did the first one.
- Glue B2 to the top, in the center, of B1. (Make two)
- Glue one B2/B1 unit to the top of the shelf unit with the smaller piece facing upward.
- Glue the remaining B2/B1 unit to the bottom of the shelf unit with the smaller piece facing downward.
- Glue each of the vine pattern side pieces onto the solid side pieces.

Thank you so much for your purchase of this kit and for supporting my small business. It truly means the world to me!!!!

PERSONAL USE ONLY – you may not share the SVG file, instructions, or sale the file/finished item in any way for monetary gain.
